**Subject:** damaged transmission

Jamie I went to the dump on Barrie Drive at about 2:30 pm on November 23 to drop off garbage and recycling I first dropped the recycling and then stopped at the metal pile to drop some metal and then proceeded to go to the garbage pile to back the truck in on the right side of the pile and I heard something hit what I thought was front axle or may be the frame. After I stopped backing up I looked forward and saw a piece of thin piece of metal, cable or heavy wire sticking out the ground. I proceeded to then drop off my garbage I then got back in my truck and I waited for another truck to back and then I drove off around what ever was stick out the ground. When I reached Barrie Drive I turned right and drove up to the Nor West Rec Center where I noticed smoke coming out from behind my truck and I stopped at the rec center and found that transmission fluid was draining out my. I had the truck towed in town to the transmission place at the corner off Central and Fort William Road. Mike the guy at the garage told me the lines from the transmission were ripped out the radiator. I do not have all the details yet or the cost but will I call you and let you know.
