

NOTICE

Used Tire Acceptance at the Landfill Site New Process Starting July 11, 2015

Under the Ontario Tire Stewardship Program, used tires generated from only residential/farm properties are allowed to be dropped off at the landfill site. Tires generated from a business/commercial property are not eligible. Businesses should contact Ontario Tire Stewardship at 1-888-687-2202 or visit www.rethinktires.ca to inquire about options for used tires.

Used tires coming into the landfill should be clean and off the rim if possible. Upon entering the landfill, report to the Landfill Attendant the number and types of used tires you have. The Attendant will record your access card number and the number and types of tires. This information is required by the Municipality for mandatory reporting to Ontario Tire Stewardship and to show that tires are only being accepted from residential/farm properties.

Place the tires in the designated area and barrel stack them, no more than 6 high. Stacking them in this way makes it easier for the tire hauler to count and load into the truck for transport.
